EDUCATION

Texas State University, College of Science and Engineering - *Magna Cum Laude, GPA: 3.67* San Marcos, Texas
Degree: Bachelor of Science in Computer Science, Minor in Mathematics August 2022 - December 2025
Achievements: President's Honor Scholarship, Dean's List
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design & Programming, Software Engineering, Operating Systems, Computer Networks, Computer Systems Security, Parallel Programming, Internet Software Development

SKILLS

Languages: JavaScript, Python, Java, C++, C#
Frontend: React, TypeScript, HTML, CSS, Vite
Backend: Django, Flask, Node.js, Express.js, REST APIs
Databases: PostgreSQL, MongoDB, Firebase
Cloud & DevOps: AWS (S3, CloudFront, IAM), GitHub Actions, CI/CD
Tools & Testing: Git, Jira, Agile/Scrum, PyTest, JUnit, Vitest, Jest
Concepts: Object-Oriented Programming, Data Structures & Algorithms, RESTful APIs, Responsive Design

EXPERIENCE

Independent Software Developer San Marcos, TX
Personal & Open Source Projects August 2023 - Present

- Developed and deployed full-stack web applications using React, Django, PostgreSQL, and AWS
- Managed the complete software development lifecycle from planning and prototyping through testing, deployment, maintenance, and iterative feature development using Agile-inspired workflows and version control
- Researched and integrated new technologies, frameworks, and APIs to solve technical challenges, rapidly learning unfamiliar tools and independently delivering production-ready solutions

Discount Tire San Marcos, TX
Sales Apprentice, Service Coordinator, Crew Chief, Service Technician June 2024 - Present

- Earned four progressive roles through demonstrated leadership, technical proficiency, and operational performance
- Coordinated teams of up to 12 employees supporting service operations exceeding 100 vehicles per day in a high-volume environment
- Trained new employees, assisted with customer issue resolution, and implemented workflow improvements that increased operational efficiency

PROJECTS

CaughtOnDash | Django, React, PostgreSQL, Clerk, Supabase
AI-Assisted Dashcam Footage Platform

- Built a full-stack platform for dashcam footage management with authentication and cloud-hosted storage
- Designed backend and service worker supporting AI-powered video analysis and metadata extraction workflows

FiberSync | React, Flask, WebSockets, MongoDB
Real-Time Messaging Platform

- Contributed 150+ commits implementing API routes, WebSocket communication, user presence, and automated testing
- Collaborated in an Agile team using Jira to deliver a real-time messaging application

Visionary | OpenCV, Python, C++, YOLOv8, DeepSORT, Arduino
Computer Vision Target Tracker

- Developed an OpenCV-based system for real-time object detection and target tracking
- Integrated computer vision algorithms with external hardware control for automated target positioning

Meal Prep Pantry | React, OCR, MongoDB
Recipe and Nutrition Management Platform

- Developed a full-stack application for recipe management, nutrition tracking, and ingredient cost comparison
- Implemented OCR extraction from 4+ sources and designed the application's database and deployment architecture

MLE Healthcare Algorithm | Python, Machine Learning, C#, Microsoft SEAL
Healthcare and Security Research

- Extended machine learning training workflows to support 3 new datasets within a genomic healthcare encryption project
- Developed and tested dataset processing and model training functionality for healthcare-focused applications
